

Environment & Energy Committee

ACEC STRATEGIC PLAN: The six strategic goals under the plan are:

1. Become recognized by all engineering companies in the United States as their legislative advocate for the promotion and protection of their business interests.
2. Become recognized by all engineering companies in the United States as their primary resource on business practices.
3. Become recognized by all stakeholders in the built environment as the national voice of the engineering industry.
4. Grow ACEC/PAC to a \$1 million-per-year PAC by 2010, while “capturing” the influence of our most politically active individual members.
5. Grow the Minuteman Fund to respond to critical state issues and federal appellate cases while maintaining a “war chest” of \$1 million.
6. Grow the number of member firms by 2% each year, grow the number of member firm employees by 3% each year, and recruit 90% of the eligible *ENR* “Top 500 Design Firms” as ACEC members by 2010.

PURPOSE:

The purpose of the Environment & Energy Committee is to develop industry-wide consensus positions and national leadership on a wide range of issues important to environmental engineering firms; undertake a proactive legislative and regulatory advocacy program; develop public and private market programs of interest to the membership; and communicate with the ACEC membership on vital environmental and energy issues that will affect their businesses.

2008-2009 GOALS:

1. Increase ACEC’s visibility on the Hill with regard to environmental and energy issues.
2. Continue to work towards introduction and passage of a water infrastructure reauthorization bill that includes QBS requirements, a trust fund, and increased water appropriations.
3. Increase the Committee’s efforts relative to the development and passage of a new WRDA bill.
4. Promote the business interests of ACEC firms in climate change and sustainability legislation.
5. Develop a meaningful energy agenda responsive to the needs of ACEC’s firms that engineer power plants and other energy facilities.
6. Collaborate with other trade groups, government associations and select not-for-profits to promote ACEC’s environmental and energy agenda.
7. Actively promote environmental and energy legislation and regulatory initiatives that affect ACEC member firms, while actively opposing legislation and regulations that are detrimental to the interests of the engineering industry and its clients.

8. Collaborate with coalitions and client organizations to address wetlands legislation and other water issues affecting land development.
9. Continue dialogue and outreach with EPA on committee issues.

PROGRESS REPORTS:

The Committee shall make quarterly reports to the Chairman (copied to the President) on progress made in achieving Committee goals.
