The Council of American Structural Engineers (CASE) is a **national association of structural engineering firms**. CASE provides a forum for action to improve the business of structural engineering through implementation of best practices, reduced professional liability exposure and increased profitability.

**Our mission is to improve the practice of structural engineering** by providing business practice resources, improving quality, and enhancing management practices to reduce the frequency and severity of claims.

**Our vision** is to be the leading provider of risk management and business practice education and information for use in the structural engineering practice.

*The American Council of Engineering Companies (ACEC) is the voice of America's engineering industry. Council members, numbering more than 5,000 firms throughout the country, are engaged in a wide range of engineering works that propel the nation's economy, and enhance and safeguard America's quality of life. These works allow Americans to drink clean water, enjoy a healthy life, take advantage of new technologies, and travel safely and efficiently. The Council's mission is to contribute to America's prosperity and welfare by advancing the business interests of member firms.*
