April 8, 2016

Dear Majority Leader McConnell, Minority Leader Reid, Chairman Hatch, and Ranking Member Wyden:

We write to urge a multi-year extension of the Section 179D tax deduction for energy efficient commercial and multifamily buildings, with the bipartisan refinements to the provision included in S. 1946, the Tax Relief Extension Act of 2015. Section 179D is scheduled to expire on December 31, 2016 and certainty about this important tax policy’s future is critical. We respectfully request that Section 179D be addressed as part of the first moving vehicle.

Our organizations and companies represent a broad spectrum of the U.S. economy. They include real estate, manufacturing, architecture, contracting, engineering, building services, financing, labor, education, environmental and energy efficiency advocates. We represent many small businesses that drive and sustain American job growth.

Section 179D provides a tax deduction to help offset some of the high costs of energy efficient components and systems for commercial and larger multifamily buildings. The 179D deduction has leveraged billions of dollars in private capital, resulted in the energy-efficient construction of thousands of buildings, and created and preserved hundreds of thousands of jobs. It has lowered demands on the power grid, moved our country closer to energy independence, and reduced carbon emissions.

The bipartisan, broadly-supported amendments proposed to Section 179D as part of S. 1946 would strengthen it by allowing tribal governments and non-profits to allocate the deduction to designers. Having been approved by the Senate Finance Committee twice, these commonsense modifications have been carefully analyzed, thoroughly vetted, and should be enacted.

Furthermore, these provisions provide a sound policy bridge to comprehensive tax reform efforts. We also favor improvements to the 179D deduction to better enable retrofits for buildings owned and managed by private sector owners, and encourage that any extenders package incorporate the common sense, technology neutral, and performance based provisions, such as those offered by Senators Cardin, Feinstein, and Schatz in title I of S. 2189 filed last Congress.
Coalition to Extend and Improve the 179D Tax Deduction for Energy Efficient Buildings

We strongly urge Congress to extend Section 179D and make the refinements proposed in S. 1946 at the earliest possible opportunity. Thank you.

Sincerely,
