

The logo for the American Council of Engineering Companies (ACEC) features the acronym "ACEC" in a large, bold, serif font. Above the letters is a thin, curved yellow line that arches over the top of the text.

AMERICAN COUNCIL OF ENGINEERING COMPANIES

100 Years of Excellence

FOR IMMEDIATE RELEASE

MAY 12, 2015

Alan D. Crockett, ACEC, 202-682-4301; acrockett@acec.org

**Statement by David A. Raymond,
President & CEO of the American Council of Engineering Companies**

Pacific Trade Deal and Crumbling Infrastructure – What’s the Point?

While political leaders are bent around the axle on the Pacific trade deal, the clock is ticking down toward the May 31st deadline to renew our nation’s highway funding. America’s crumbling infrastructure—and Congress’ failure to pass a long-term program—will undermine the advantages of any trade agreement. What’s the point of opening up to new global customers when America’s roads, ports, and airports can’t even handle the current load?”

The American Council of Engineering Companies (ACEC) is the business association of America’s engineering industry, representing more than 5,000 independent engineering firms and more than 600,000 professionals throughout the U.S. engaged in the development of America’s transportation, water and energy infrastructure, along with environmental, industrial and other public and private facilities. Founded in 1909, ACEC is a national federation of 51 state and regional organizations.
