Lunch

12:00 PM - 1:00 PM: Lunch and Presentation

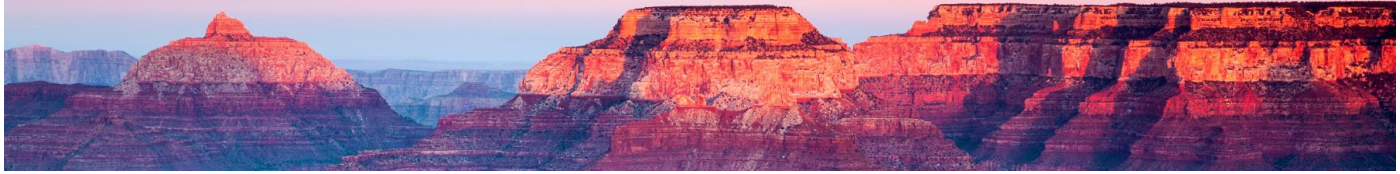

This presentation will cover a local engineering project currently underway in Arizona. It will provide an overview of the project's scope, objectives, and the innovative solutions being applied to address the region's unique challenges. Attendees will learn about the design, planning, and execution phases, as well as the collaboration between local stakeholders and engineers to ensure the project's success.

Afternoon: Education Sessions/Presentations and Roundtable

1:30 PM - 2:30 PM: **Advancing Resilience in Infrastructure**

This session, led by Jeff Gebhard, VP of Braun Intertec, and Shawna Erter, VP of SCI Engineering, will focus on the vital role of geoprofessionals in responding to the challenges of extreme weather events and climate change. As these events increasingly threaten communities and infrastructure, engineers and scientists ensure the stability of critical systems. The discussion will also explore the emerging role of the Resilience Specialist, with an emphasis on designing sustainable infrastructure and managing the rising costs of repairs following catastrophic events.
