

The American Council of Engineering Companies New Mexico (ACEC New Mexico) is devoted exclusively to the business interests of engineers in private practice. With the active involvement and support of our membership, ACEC New Mexico helps create a business environment that encourages quality and innovative design, community service, and financial success.

ACEC New Mexico is a dynamic business association with more than 40 members, employing over 5,000 employees in the independent private practice of consulting engineering.

## WHAT WE DO

ACEC New Mexico maintains a presence in the New Mexico Legislature and with state and local agencies in order to represent business and professional interests. Through our ongoing lobbying efforts, ACEC New Mexico works to ensure legislative and agency leaders receive information and opinions from consulting engineers on issues affecting the consulting engineering profession and the public.

- Government Relations & Advocacy
- Professional Development
- Programs & Awards
- Networking & Monthly Membership Meetings
- Professional Technical Advisory Board (PTAB)

- Stantec
- Stubbs Engineering
- T2 Utility Engineers
- Terracon
- TYLin International Group
- Wilson & Company
- Wood
- WSP

ACEC New Mexico's Professional Development Program (PDP) is open to all employees of ACEC New Mexico Members, as well as non-members. The PDP includes an annual Legislative Day at The Capitol in Santa Fe, where participants learn about the legislative process and how important it is to our industry and have the opportunity to meet with their state legislators. All participants are then recognized at the Annual Awards GALA.

- Conferences, Seminars, and Workshops
- Roundtable Discussions
- Young Professionals Events
- Registered Continuing Education Program

DEVELOPMENT**

## PROGRAMS & AWARDS

### ENGINEERING EXCELLENCE AWARDS

Engineering Excellence Awards are presented annually by ACEC New Mexico to recognize engineering achievements and to demonstrate the highest degree of merit and ingenuity. The awards pay tribute to New Mexico's most prestigious and distinguished engineering projects.

ACEC New Mexico Member Awards recognize individuals and member firms that make a difference in our community through their leadership, commitment, accomplishments, and support to ACEC New Mexico.

### ASPIRING PRINCIPLES PROGRAM (APP)

The APP is a career-development initiative designed to prepare emerging leaders in engineering firms for principal-level roles. The program focuses on leadership skills, business acumen, and strategic thinking needed to succeed in firm ownership or top executive positions.
